

Histidyl-tRNA Synthetase (Jo-1)

Antigen Specification

Product Number: 12900

Description:

Human histidyl-tRNA synthetase (EC 6.1.1.21; Jo-1).
Recombinant antigen for solid (ELISA) and fluid phase diagnostic assays.

Immunological function:

Binds IgG-type human auto-antibodies.

Origin:

Recombinant. Expressed by recombinant baculovirus (*Autographa californica* multiple nuclear polyhedrosis virus; AcMNPV) infection of *Spodoptera frugiperda* Sf9 insect cells.

Expression construct:

Full-length cDNA coding for the human histidyl-tRNA synthetase (Jo-1) fused to a hexa-histidine purification tag.

Biochemical tests:

SDS-PAGE (purity > 90 %); Western blot with i: Polymyositis sera; ii: monoclonal anti-hexa-His-tag antibody.

Calculated molecular weight:

58,291 Dalton

Calculated isoelectric point:

pH 5.9

Immunological tests/Functionality:

Standard ELISA test (checkerboard analysis of positive/negative sera panels, including CDC international reference sera).

Recommended buffer/storage and handling conditions:

Recommendations for storage buffer: ionic strength between 200 and 250 mM salt, neutral to slightly alkaline pH and 20% glycerol as cryoprotective agent. Storage temperature: -70° to -80° C. Repeated freeze/thaw cycles should be avoided.

Coating concentration:

0.2-0.4 µg/ml (depending on the type of ELISA plate and coating buffer). Suitable for biotinylation and iodination.
