

Recombinant Human Ro/SS-A Protein (52 kDa)

Antigen Specification

Product Number: 12700

Description:

Human Ro/SS-A protein (52 kDa).
Recombinant antigen for solid (ELISA)
and fluid phase diagnostic assays.

Immunological function:

Binds IgG-type human auto-antibodies.

Origin:

Recombinant. Expressed by
recombinant baculovirus (*Autographa
californica* multiple nuclear
polyhedrosis virus; AcMNPV) infection
of *Spodoptera frugiperda* Sf9 insect
cells.

Expression construct:

Full-length cDNA coding for the human
Ro/SS-A (52 kDa) fused to a hexa-
histidine purification tag.

Biochemical tests:

SDS-PAGE (purity > 90 %); Western-
Blot with i: SLE sera (secondary
Sjogren's syndrome); ii: monoclonal
anti-hexa-His-tag antibody.

Calculated molecular weight:

54,922 Dalton

Calculated isoelectric point:

pH 6.15

Immunological tests/Functionality:

Standard ELISA test (checker-board
analysis of positive/negative sera
panels, including CDC international
reference sera)

**Recommended buffer/storage and
handling conditions:**

Recommendations for storage buffer:
neutral to slightly alkaline pH; due to
purification workup under denaturing
conditions presence of up to 0.02 %
SDS (or similar detergents) may be
required for maintaining solubility.
Storage temperature: -70° to -80° C.
Repeated freeze/thaw cycles should
be avoided.

Coating concentration:

0.3-0.65 µg/ml (depending on the type
of ELISA plate and coating buffer).
Suitable for biotinylation and iodination.
