

Proliferating Cell Nuclear Antigen (PCNA)

Antigen Specification

Product Number: 15400

Description:

Human Proliferating Cell Nuclear Antigen/Cyclin (PCNA). Recombinant antigen for research use or manufacturing only.

Calculated molecular weight:

30 kDa

Calculated isoelectric point:

pH 4.8

Immunological function:

Binds IgG-type human auto-antibodies.

Immunological tests/Functionality:

Standard ELISA test (checkerboard analysis of positive/negative samples); immunodot analyses with positive/negative samples.

Origin:

Recombinant. Expressed by recombinant baculovirus (*Autographa californica* multiple nuclear polyhedrosis virus; AcMNPV) infection of *Spodoptera frugiperda* Sf9 insect cells.

Recommended buffer/storage and handling conditions:

Recommendations for storage buffer: neutral to slightly alkaline pH, and 20% glycerol as cryoprotective agent. Storage conditions: -70°C or below. Repeated freeze/thaw cycles should be avoided.

Expression construct:

Full-length cDNA coding for the human Proliferating Cell Nuclear Antigen/Cyclin fused to a hexa-histidine purification tag.

Coating concentration:

0.5-1.1 µg/mL (depending on the type of ELISA plate and coating buffer; **CAUTION:** these values are not based on exhaustive testing and are only guidelines for customer's development work). Suitable for labeling of functional groups.

Biochemical tests:

SDS-PAGE (purity > 90%); Western blot with i: anti-PCNA autoantibody-positive sample; ii: monoclonal anti-His-tag antibody.
