

GAD65 biotinylated

Antigen Specification

Product Number: 20800

Description:

Human glutamate decarboxylase 65 kDa (GAD65) protein. Biotinylated recombinant antigen for in vitro research and manufacturing use only.

Immunological function:

Binds IgG-type human auto-antibodies. Auto-antibodies to GAD65 recognize conformation-dependent epitopes.

Origin:

Recombinant. Expressed by recombinant baculovirus (*Autographa californica* multiple nuclear polyhedrosis virus; AcMNPV) infection of *Spodoptera frugiperda* Sf9 insect cells.

Expression construct:

Full-length cDNA coding for human GAD65 fused to a hexa-histidine purification tag.

Biochemical tests:

Electrophoresis (purity > 80%).

Calculated molecular weight:

66 kDa (for protein component)

Calculated isoelectric point:

pH 6.6

Immunological tests/Functionality:

Functional Streptavidin-based ELISA test (analysis of positive/negative samples).

Recommended buffer/storage and handling conditions:

Recommendations for storage buffer: ionic strength around 250 mM, neutral to slightly alkaline pH, 0.16% Triton X-100 to maintain solubility of this hydrophobic enzyme and 20% glycerol as cryoprotective agent. Presence of the coenzyme pyridoxal phosphate is recommended.

Storage conditions: -70°C or below. Repeated freeze/thaw cycles should be avoided.
