

**Product number:**

SB04-0015-01 (15 mL)

SB04-0125-01 (125 mL)

SB04-1000-01 (1000 mL)

**Intended use:**

StabilBlot™ Blocker Family enhances sensitivity and minimizes background in blotting applications. We offer a range of options, both protein-based and synthetic-based, to block non-specific binding as well as enhance sensitivity when used as a blocker and antibody diluent.

**Product stability, storage and specifications:**

Product stability	Stable for 3 years from date of manufacture
Storage	Product should be stored at 2-8°C
Specification	Protein: Milk Product Buffer: Borate 10X pH: 5.50 ±0.50 1X pH: 7.60 ±0.50
Notes	Please note that SurModics products are shipped to customers at ambient temperature. Extensive stability studies have shown that prolonged storage at ambient temperature will not affect the product quality or efficacy.

**Recommendations for use:**

Aseptically pour off the desired volumes of material needed for the application and allow the product to equilibrate at room temperature prior to use. To make a working strength blocking solution dilute one part StabilBlot™ Milk Blocker-10X with nine parts deionized water. Mix well.

The following are general guidelines only.

- 1) Remove the membrane from the transfer apparatus.
- 2) Add enough working strength StabilBlot™ Milk Blocker to cover the membrane and incubate at room temperature for 30-90 minutes with agitation.
- 3) Continue Western blot according to the defined assay protocol. It is also recommended to use working strength StabilBlot™ Milk Blocker for primary and secondary antibody dilutions.
